

St Clement's C of E Primary School

Allergy Management Policy

Adopted by school (The Key - LS): January 2025

Reviewed by LS: February 2026

Approved by JP (Head): February 2026

Due for review: February 2027

"With Faith, Hope and Love We Can Achieve Greater Things."

"Love is patient and kind. Love is not jealous or boastful or proud or rude. It does not demand its own way. It is not irritable, and it keeps no record of being wronged. It does not rejoice about injustice but rejoices whenever the truth wins out. Love never gives up, never loses faith, is always hopeful, and endures through every circumstance. Three things will last forever- faith, hope and love- and the greatest of these is love." 1 Corinthians 13:4-7 New Living Translation

Vision Statement:

At St Clements, we aim to ensure that everyone thrives within our caring Christian community. We will use our Christian Values and Bible verse to provide hope during difficult times, gain strength from our faith and ensure love guides us, as an inclusive school family, in all of our actions.

Our Christian Values: (Guiding our Thinking and Behaviour)

Love- (Core Value alongside which all our 6 Values Flow):

Faith

Hope

Respect

Compassion

Forgiveness

Thankfulness

DDA STATEMENT

At St. Clement's we will aim to:

- **Promote equality of opportunity between disabled people and others.**
- **Eliminate discrimination that is unlawful under the Act.**
- **Eliminate harassment of disabled pupils that is related to their disabilities.**
- **Promote positive attitudes towards disabled people.**
- **Encourage participation by disabled people in public life.**
- **Take account of a disabled person's disabilities, even when that involves treating a disabled person more favourably than another person.**

1. Aims

This policy aims to:

- Set out our school's approach to allergy management, including reducing the risk of exposure and the procedures in place in case of allergic reaction
- Make clear how our school supports pupils with allergies to ensure their wellbeing and inclusion
- Promote and maintain allergy awareness among the school community

2. Legislation and guidance

This policy is based on the Department for Education (DfE)'s guidance on [allergies in schools](#) and [supporting pupils with medical conditions at school](#), the Department of Health and Social Care's guidance on [using emergency adrenaline auto-injectors in schools](#), and the following legislation:

- [The Food Information Regulations 2014](#)
- [The Food Information \(Amendment\) \(England\) Regulations 2019](#)

3. Roles and responsibilities

We take a whole-school approach to allergy awareness.

3.1 Allergy lead

The nominated allergy lead is Jane Parker- Head Teacher.

They are responsible for:

- Promoting and maintaining allergy awareness across our school community
- Recording and collating allergy and special dietary information for all relevant pupils. Although the allergy lead has ultimate responsibility, Leah Steeles and Zoe Law will have a supporting role in information collection and care plan implementation.
- Ensuring:
 - All allergy information is up to date and readily available to relevant members of staff
 - All pupils with allergies have an allergy action plan completed by a medical professional

- All staff receive an appropriate level of allergy training
 - All staff are aware of the school's policy and procedures regarding allergies
 - Relevant staff are aware of what activities need an allergy risk assessment
- Keeping stock of the school's adrenaline auto-injectors (AAIs)
 - Regularly reviewing and updating the allergy policy

3.2 School administrators

Leah Steeles, Zoe Law and **Victoria Johnstone-Millin** are responsible for:

- Meeting parent/carers and co-ordinating the paperwork and information from families
- Co-ordinating medication with families
- Checking spare AAIs are in date
- Any other appropriate tasks delegated by the allergy lead

3.3 Teaching and support staff

All teaching and support staff are responsible for:

- Promoting and maintaining allergy awareness among pupils
- Maintaining awareness of our allergy policy and procedures
- Being able to recognise the signs of severe allergic reactions and anaphylaxis
- Attending appropriate allergy training as required
- Being aware of specific pupils with allergies in their care
- Carefully considering the use of food or other potential allergens in lesson and activity planning
- Ensuring the wellbeing and inclusion of pupils with allergies

3.4 Parents/carers

Parents/carers are responsible for:

- Being aware of our school's allergy policy
- Providing the school with up-to-date details of their child's medical needs, dietary requirements, and any history of allergies, reactions and anaphylaxis
- If required, providing their child with 2 in-date adrenaline auto-injectors and any other medication, including inhalers, antihistamine etc., and making sure these are replaced in a timely manner
- Carefully considering the food they provide to their child as packed lunches and snacks, and trying to limit the number of allergens included
- Following the school's guidance on food brought in to be shared
- Updating the school on any changes to their child's condition

3.5 Pupils with allergies

These pupils are responsible for:

- Being aware of their allergens and the risks they pose

- Understanding how and when to use their adrenaline auto-injector
- If age-appropriate, carrying their adrenaline auto-injector on their person and only using it for its intended purpose
- Alerting staff/adults if they are feeling unwell

3.6 Pupils without allergies

These pupils are responsible for:

- Being aware of allergens and the risk they pose to their peers

Older pupils might also be expected to support their peers and staff in the case of an emergency.

4. Assessing risk

The school will conduct a risk assessment for any pupil at risk of anaphylaxis taking part in:

- Lessons such as food technology
- Science experiments involving foods
- Crafts using food packaging
- Off-site events and school trips
- Any other activities involving animals or food, such as animal handling experiences or baking

A risk assessment for any pupil at risk of an allergic reaction will also be carried out where a visitor requires a guide dog.

5. Managing risk

5.1 Hygiene procedures

- Pupils are reminded to wash or sanitise their hands before and after eating
- Sharing of food is not allowed
- Pupils have their own named water bottles or drinking cup

5.2 Catering

The school is committed to providing safe food options to meet the dietary needs of pupils with allergies.

- Catering staff receive appropriate training and are able to identify pupils with allergies
- School menus are available for parents/carers to view with ingredients clearly labelled
- Where changes are made to school menus, we will make sure these continue to meet any special dietary needs of pupils
- Food allergen information relating to the 'top 14' allergens is displayed on the packaging of all food products, allowing pupils and staff to make safer choices. Allergen information labelling will follow all [legal requirements](#) that apply to naming the food and listing ingredients, as outlined by the Food Standards Agency (FSA)
- Catering staff follow hygiene and allergy procedures when preparing food to avoid cross-contamination

5.3 Food restrictions

We acknowledge that it is impractical to enforce an allergen-free school. However, we would like to encourage pupils and staff to avoid certain high-risk foods to reduce the chances of someone experiencing a reaction. These foods include:

- Packaged nuts
- Cereal, granola or chocolate bars containing nuts

- Peanut butter or chocolate spreads containing nuts
- Peanut-based sauces, such as satay
- Sesame seeds and foods containing sesame seeds

If a pupil brings these foods into school, they may be asked to eat them away from others to minimise the risk, or the food may be confiscated.

5.4 Insect bites/stings

When outdoors:

- Shoes should always be worn
- Food and drink should be covered
- Insect bites and stings will be treated with a cold compress and parents will be notified via a phone call.
- Staff will not take out any foreign objects e.g. wasp stings that are left in the skin.

5.5 Animals

- All pupils will always wash hands after interacting with animals to avoid putting pupils with allergies at risk through later contact
- Pupils with animal allergies will not interact with animals

5.6 Support for mental health

Pupils with allergies will have additional support through:

- Pastoral care e.g. 1-1 sessions or the opportunity to attend 'Let's Talk' drop in sessions
- Regular check-ins with their class teacher.

5.7 Events and school trips

- For events, including ones that take place outside of the school, and school trips, no pupils with allergies will be excluded from taking part
- The school will plan accordingly for all events and school trips, and arrange for the staff members involved to be aware of pupils' allergies and to have received adequate training
- Appropriate measures will be taken in line with the schools AAI protocols for off-site events and school trips (see section 7.5).

6. Procedures for handling an allergic reaction

6.1 Register of pupils with AAls

This will link to your 'supporting pupils with medical conditions' policy.

- The school maintains a register of pupils who have been prescribed AAls or where a doctor has provided a written plan recommending AAls to be used in the event of anaphylaxis. The register includes:
 - Known allergens and risk factors for anaphylaxis
 - Whether a pupil has been prescribed AAI(s) (and if so, what type and dose)
- The register is kept in the main care plan file, situated in the SBM's office and can be checked quickly by any member of staff as part of initiating an emergency response

Allowing all pupils to keep their AAls with them will reduce delays and allows for confirmation of consent without the need to check the register.

6.2 Allergic reaction procedures

- As part of the whole-school awareness approach to allergies, all staff are trained in the school's allergic reaction procedure, and to recognise the signs of anaphylaxis and respond appropriately
- Staff are trained in the administration of AAls to minimise delays in pupil's receiving adrenaline in an emergency
- If a pupil has an allergic reaction, the staff member will initiate the school's emergency response plan, following the pupil's allergy action plan
 - If an AAI needs to be administered, a member of staff will use the pupil's own AAI. If the pupil has no allergy action plan, staff will follow the school's procedures on responding to allergy and, if needed, the school's normal emergency procedures. If a pupil needs to be taken to hospital, staff will stay with the pupil until the parent/carer arrives, or accompany the pupil to hospital by ambulance
- If the allergic reaction is mild (e.g. skin rash, itching or sneezing), the pupil will be administered with their prescribed medication e.g. antihistamine and monitored while the parents/carers are informed

7. Adrenaline auto-injectors (AAls)

7.1 Purchasing of spare AAls

The allergy lead is responsible for buying AAls if required and ensuring they are stored according to the guidance.

- Where the AAls will be sourced (i.e., a local pharmacy)
- The quantity of AAls required
- Which brand(s) of AAI are purchased (schools are recommended to buy a single brand to avoid confusion)?
- The dosage required (based on Resuscitation Council UK's age-based criteria, see page 11 of [the guidance](#))

(See pages 11 and 12 of the guidance.)

7.2 Storage (of both spare and prescribed AAls)

The allergy lead will make sure all AAls are:

- Stored at room temperature (in line with manufacturer's guidelines), protected from direct sunlight and extremes of temperature
- Kept in a safe and suitably central location to which all staff have access at all times, but is out of the reach and sight of children
- **Not** locked away, but accessible and available for use at all times
- **Not** located more than 5 minutes away from where they may be needed.

7.3 Maintenance (of spare AAls)

The child's class staff are responsible for checking monthly that:

- The AAls are present and in date
- Replacement AAls are obtained when the expiry date is near

7.4 Disposal

AAls can only be used once. Once a AAI has been used, it will be given back to the parent/carer to dispose of in line with the manufacturer's instructions.

7.5 Use of AAls off school premises

- Pupils at risk of anaphylaxis who are able to administer their own AAls should carry their own AAI with them on school trips and off-site events

8. Training

The school is committed to training all staff in allergy response. This includes:

- How to reduce and prevent the risk of allergic reactions
- How to spot the signs of allergic reactions (including anaphylaxis)
- The importance of acting quickly in the case of anaphylaxis
- Where AAls are kept on the school site, and how to access them
- How to administer AAls
- The wellbeing and inclusion implications of allergies.
- Training will be carried out annually by the school nurse team or allergy lead.

It's recommended that all staff are trained at least once a year.

9. Links to other policies

This policy links to the following policies and procedures:

- Health and safety policy
- Supporting Pupils with Medical Conditions Policy
- School Food Policy
